

BTSK5

Automatic balancing machine

Applications

Features

- Automatic balancing machine for assembled vacuum cleaner motors.
- The machine is composed by: unbalance measuring unit, impeller angular positioning and unbalance compensation unit by punching on the impeller.
- The assembled vacuum cleaner motor is picked up directly from the loading transport pallet line, that usually is supplied by the customer. Machine easy to install and to use.
- The machine can be equipped for a wide range of assembled vacuum cleaner motors.

Technical data

| | |
|--------------------------|--------------------------------|
| Parts max weight: | 2 kg |
| Parts max diameter: | 100 mm |
| Unbalance measure speed: | Programmable |
| Cycle time: | 19 s |
| Dimensions (LxWxH): | 1450 x 1300 x 2300 mm |
| Weight: | 2200 kg |
| Power supply: | 380-480 V three-phase 50/60 Hz |
| Compressed air: | 6 bar |
| Controlled by: | Industrial PC |

Options

- Industrial vacuum cleaner for removing cutting or milling chips
- SPC Software
- Tele-service
- Calibration Master
- DMC reader
- Electronic pallet codification
- Tooling plausibility control
