

DMK4-R

Semi-automatic balancing machine

Applications

Features

- Semi automatic balancing machine, specifically developed for balancing rotors for asynchronous motors, brushless motors and similar rotating parts, in a completely automatic way on two planes (dynamic).
- The unbalance is corrected by removing material as an outcome of radial drilling or axial milling.
- Operator interface by industrial PC.
- High level of flexibility and quick changeover.
- Manual loading/unloading.

Technical data

Parts max weight:	4 kg
Parts max diameter:	80 mm
Unbalance measure speed:	Programmable
Cycle time:	20 s
Dimensions (LxWxH):	1500 x 1700 x 2200
Weight:	1800 kg
Power supply:	380-480 V three-phase 50/60 Hz
Compressed air:	6 bar
Controlled by:	Industrial PC

Options

Re-checking unit
Industrial vacuum cleaner for removing drilling chips
SPC software and printer
Teleservice
Calibration master
Marking device
